## (54) MOVING IMAGE EDITING SYSTEM AND MOVING IMAGE REPRODUCING SYSTEM

### (57)Abstract:

PURPOSE: To easily edit moving image data in each frame unit and to reproduce a fine moving image from the moving image data edited in each frame unit.  
 CONSTITUTION: The bit stream of a moving image based upon an MPEG1 system is constituted of the repeat, of GOPs 12 consisting of plural frames and sequence headers 11 for defining the attributes of the GOPs 12. Each sequence header 11 is provided with a user data area 13. When user executes editing operation, information for defining the display order of still images in the bit stream is stored in an index 14 prepared in the user data area 13. A command code 18 expressing the sort (the insertion of another file, the partial insertion of another file, the specification of a reference file, or the specification of jump) of a command to be executed for a frame in a corresponding GOP 12 and command data 19 expression the frame or the like to be executed by the command are included in the index 14.

### LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
